The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 contradicts claim 1 from which it depends. In claim 1 the first electrode connects the N epitaxial layer to ground. In claim 2 it is not connected to ground. Clarification is required. Claim 3 is confusing because the "first N type semiconductor region" appears to be the "source region", and it is unclear what structure (fourth electrode or source region or P type semiconductor region) is separated from the P well. Likewise, claim 4 is confusing because the drain region should be the "second N type semiconductor region". Claim 5 is confusing because the third semiconductor region is somehow formed in and separated from the N type epitaxial region. The figures show otherwise. Likewise claim 6 is confusing as the the second p type region is somehow formed in and separated from the first p type buried layer.

Claims 1 and 7 are allowable over the art of record.

Claims 2-6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Yashita '964, Tegatz '309, and Paparo '273 are relevant art.
